The Big Battleship "Illinois"

Very Superior Description of the Equipment and Appearance of War Vessel.

This is the Ship of Which a Utah Boy Has Just Been Made Commander.

On Sunday, July 30, a party of visitors, including the editor of the "Daily Utah Statesman," Captain Arthur H. Bond, of the United States Navy, Capt. John H. Foreman, of the Utah Star, a few ladies and children, and a host of friends, were invited to visit the battleship "Illinois," at the Naval Armory as it was known then. The writer was one of the group who entered the ship. The "Illinois" was the second ship in the world to be destroyed by an explosion of dynamite. The first, the "Boston," was lost in the same way.

The party was received by the captain of the ship, who gave a detailed description of the ship's equipment. The ship is 540 feet long, 90 feet wide, and 35 feet deep. It is armed with 15-inch guns, 9-inch guns, and 4.7-inch guns. The ship has a displacement of 44,000 tons and a speed of 20 knots. It is armed with 15-inch guns, 9-inch guns, and 4.7-inch guns. The ship has a displacement of 44,000 tons and a speed of 20 knots.

The ship is fitted with a powerful electric plant, which is capable of producing 10,000 horse-power. The ship is also fitted with a dynamo plant, which is capable of producing 2,000 horse-power. The ship is also fitted with a dynamo plant, which is capable of producing 2,000 horse-power.
