WORK OF CABLE SHIP
Silvertone to Make a Sure Job of It.

OLD TIME RISKS NOW OVERCOME
So That Cable Laying is Sure and Permanency May Be Expected.

With the San Francisco-Honolulu telegraphic cable now in use and the San Francisco-Seattle line almost ready for business, it is probable that telegraphic communication between the cities of the United States and between the United States and the Empire of Japan will be made by cable. The Government, through the Bureau of Engineering, has already granted a contract for this purpose, and the work is being prosecuted with the greatest dispatch. The cable is now being laid off the coast of Japan, and the work will be completed in a short time.

There are two cables being laid, one being the San Francisco-Honolulu line and the other the San Francisco-Seattle line. The cables are being laid by the same company, and the work is being prosecuted with the greatest dispatch. The cables are being laid in such a manner that they will be permanently connected with the land, and the work will be completed in a short time.

The cable is now being laid off the coast of Japan, and the work will be completed in a short time. The cable is being laid in such a manner that it will be permanently connected with the land, and the work will be completed in a short time.
