A Mod’rn Range

“Built to Suit the Housewife”
Do you realize how much out-of-date low oven Ranges really are? Low oven ranges were first introduced over forty years ago and in all of the forty years there has been practically no change in construction. We think it is time for a change and are at last able to offer you a truly modern range.

The Leonard Hi-Oven Range
(Burns Coal or Wood)

is a real up-to-date range. It is built especially for particular housewives. Think of the convenience of the elevated glass door oven—all work done in an easy, erect position—the baking always in sight—and owing to our special construction the oven is a perfect baker.

A Wonderful Fuel Saver

The draft construction of the LEONARD HI-OVEN RANGE is the most wonderful fuel saving device ever put on a stove. It is scientifically right. By means of this the draft is heated to at least 500 degrees before passing into the fluepipe. The gases and other products of combustion, which ordinarily pass out the chimney unburned, are then burned, which means a wonderful saving of fuel.

Come in and let us show you and explain the many special features of this range, and remember that it costs you no more than other high grade ranges of the old style, inconvenient construction.

SOCIETY

By AUDREY THOMPSON

(Continued from Page Two)

The department at the state fair this year is replete and the ray of railroad progress and encouraged expansion of the state is evident. The display of work is magnificent. All those who visit rambling around the state exhibit will have many pleasant recollections of the fair.

The great need of the state is for educational work for the youth. There must be a gradual development of the public school system. The future of the state depends upon the leaders of the state. The educational work is the foundation of all other work.

The members of the society are working very hard to promote the work of the fair. They are putting forth their best efforts to make the fair a success. The fair is a great opportunity for the people of the state to learn about the progress of the state.
