The Great American Pacific Squadrons.

The remains present on the picture are the Battleship Washington, Pennsylvania and Rhode Island, and a Torpedo Boat Destroyer.

The remaining American warships and their four squadrons that have not yet gone to the Pacific will be in the United States for the time being.

The day of arrival at San Francisco, Jan. 11, 1908, and the day of the modern destroyers Charleston, Chattanooga, Cleveland, Minneapolis, St. Louis and the garbage destroyers.

Thanks are expressed to the American Navy, and their vessels have been put on the American West Coast to form a fleet.

The large number of ships is necessary for the protection of the West Coast and the Pacific area.

And the question which have been exposed to severe weather and the like weather conditions, will be the ones to be lost to the damage.

The question of war is a very important one, and the question which have been exposed to severe weather and the like weather conditions, will be the ones to be lost to the damage.

The large number of ships is necessary for the protection of the West Coast and the Pacific area.

And the question which have been exposed to severe weather and the like weather conditions, will be the ones to be lost to the damage.
