BATTLESHIP TO MEET PRINCE

The New Hampshire Going to Quebec in Honor of Wales's Visit.

Work is being rushed on the new battleship New Hampshire in the Boston Navy Yard that she may be ready to leave here Saturday on her trip to Quebec to honor the Prince of Wales on his visit to Canada. She will be on a cruise to the Atlantic and the ocean trip, and the Navy Department has assigned Capt. Cameron McN. Winslow, who was lately relieved from the Bureau of Navigation at Washington to command her.

Capt. Winslow has had a great deal of experience in breaking in new naval craft, and he will undertake the New Hampshire through the St. Lawrence to Quebec.

The Prince of Wales is expected to arrive on the finest ship of the British Navy, the Indomitable, and it was the desire of the Prince to have a ship equal to her to meet that ship.

The work of coaling the New Hampshire will be commenced and special quarters are being arranged for Sec- tarianists, who will go to Quebec as the special representative of President Roosevelt.

Will be the first visit of an American warship to Canadian waters, and many elaborate entertainments have been planned for the American naval officers.

EQUAL PAY HEARING TO-NIGHT.

Women Teachers to Make a Vigorous Flight at Board Committee Meeting.

The contest of the New York public school teachers for increased pay will be before the hearing to-night as a special committee of the Board of Education will be held at the department building. The women teachers will renew their vigorous fight for equal pay.

The special committee is composed of School Commissioners R. L. Harrison, Chairman; George W. Wingate, John Greene, Hugo Kanzer, C. J. Sullivan, Abraham Stern, and N. Jonas.

The second assistant men teachers in the high schools have formed a special organization for the purposes of presenting a solid front in their demands. The combina- tion, it is expected, will make a vigorous appeal.

The chief public interest, however, centers on the wages of the 300,000 women teachers, which the women teachers will make. The In- terborough Association has been formed for the contest, and a committee of that organization has selected Grace C. McCall, as the speaker before the committee.

Dr. O'HANLON IN DANGER.

Coroners' Physician Infected with Blood Poisoning at Operation.

Suffering from blood poisoning, following an autopsy, Coroners' Physician Dr. Philip O'Hanlon was sent to his home at 121 West Ninety-fifth Street. He is said to be seriously ill, but Dr. O'Hanlon performed an autopsy at Gouverneur Hos- pital on the body of an Italian who had been shot in the head. After having re- mained post mortem for 9 hours Dr. O'Hanlon with his forces went after the lead bullet. His hand slipped in pulling on the forcés and struck against the skull. The bullet punctured the skull, and was slightly cut, but Dr. O'Hanlon applied the usual antiseptics and paid no further attention to it. The brain was not opened, as it was to swell and pain him. He called in two physicians who are now tending him. The wound had been opened and remedies applied to prevent the spread of the poison.
