"I figure that an advertisement placed in an evening paper will be read at least four times as well as one placed in a morning paper. The reason is obvious. In the morning people are too busy to read at any length. They turn over the headlines, and possibly read the article that suits their special interest to them—then throw the paper aside. The day's work is before them and must be done. But if the evening paper is read carefully, then they have time and also a greater inclination, to read.

Better up your business, take a broad sheet of paper and put the advertisement in the right place, the very last place."

The sentiments of one of Albuquerque's largest merchants. Think it over and decide if it is true.
