Abroad the New Mexico, the First Electric Ship

By W. J. Cash

The March of Steam

The March of Electricity

The New Mexico, steelhulled and in drydock in the Brooklyn Navy Yard.

The Best Engineering Training

A German Wooden Shoe

Castor Oil for Aircraft Engines

Science and Invention

The Officers' Quarters

Some Interesting Statistics

The Propelling Motor

Big turbo-generator unit which furnishes electric current.

Main control apparatus and switchboard.

The Conning Tower

The Navy as a whole is on a more extensive scale than it was in the last war, with better backing up and a stronger fleet of warships.
