The Bully is in the protection of two battle-cruisers, and the only concentration of fire that is heavy enough to bear on it is from the two of them. The Bully is the only ship of its class that has been designed to operate in the open sea, and the only one that can be used for this purpose. The Bully is the only ship that can be used for this purpose.

Putting down the Bully, the only concentration of fire that is heavy enough to bear on it is from the two of them. The Bully is the only ship of its class that can be used for this purpose. The Bully is the only ship that can be used for this purpose.

The Bully is in the protection of two battle-cruisers, and the only concentration of fire that is heavy enough to bear on it is from the two of them.
