VEGETABLE For JADED APPETITES

GOOD morning! Have you had your breakfast? If not, it's a new queer kind of breakfast--vegetables, at least for a change! These days we all seem to be going in for "vegetarian" things, and what is more odd, for "vegetables." I doubt, however, if they have any idea of what they are. A vegetable, according to the dictionary, is a "vegetable food," but I don't think the people who have been eating these "vegetables" would have anything to do with them! They have no idea of what they are, and are not even sure of what they are. It is a new idea, and for the time being it is a good one. The only trouble is that it is a little expensive, and the people who have been eating these "vegetables" cannot afford to go on eating them for long. They will have to be content with a little more ordinary food, or else they will have to go back to the old way of eating, and eat their vegetables as they used to do. But, after all, it is a new idea, and it is a good one. It is a new idea, and it is a good one.
