DECLASSIFIED - OPNAV INST 5500 February 1944.

From:

The Commanding Officer.

To :

The Commander in Chief, U.S. Atlantic Flest.

Subject:

Report of Operations of U.S.S. BOGUE for period

13 January to 14 February, 1944.

Reference:

- (a) CinClant dispatch 071637 of January, 1944.
- (b) PDNY, C&R, undated dispatch of January, 1944.
   (c) Naval Control Service Officer, Clyde, undated sailing orders of February, 1944.

Enclosure:

- (A) 19 photographs of Army aircraft and cargo boxes.
- (B) List of damage sustained due to heavy seas.

1. In accordance with reference (a), the BOGUE departed the Norfolk - Hampton Roads area at 1100Q, 13 January 1944, and proceeded to New York, escorted by U.S.S. HOBSON and ENDICOTT. At 1136Q, 14 January, moored to Pier 14, Stapleton, Staten Island, N.Y., ready to receive Army aircraft and cargo. Air coverage for the trip was furnished from shore stations.

- It was estimated that in order to remain within the stabilization limits and to allow for the weight of possible ice formation on the flight deck, 43 Model P-47 and 43 aircraft parts boxes could be carried.
- 3. Commenced loading at 1315, 14 January, and completed loading and securing 1645, 16 January. 25 aircraft were loaded on the flight deck and 18 on the hangar deck. 18 parts boxes were carried in the forward hold, 1 in the forward elevator pit, 3 in the after elevator pit, and 21 on the hangar deck immediately forward of the after elevator. 30 Naval officers and 172 enlisted men, with baggage, were embarked for transportation on 16 January.
- 4. The following is a recapitulation of weights involved in loading:

Aircraft - 43 P-47's @ 10,000 lbs.

Aircraft parts boxes - 43 @ 3,420 lbs.

Miscellaneous lumber, cables, turnbuckles

202 officers and men, passengers

30 officers @ 175 lbs.

430,000

147,060

26,880

70 enlisted @ 160 lbs.

# SECRET

Subject:

Report of Operations of U.S.S. BOGUE for period 13 January to 14 February, 1944. (Con't. - Page 2.)

- 5. At 11000, 18 January, departed New York, in accordance with reference (b), with Task Force 69 and the New York section of Convoy UT-7, proceeded to Lat. 42-10 North, Long. 63-15 West, rendezvoused with Boston section at 0930P, 20 January, and thence proceeded en route United Kingdom, BOSUE in position 31, acting as Convoy Vice Commodore.
- 6. At 2015A, 28 January, anchored off Greenock, Scotland, and on 29 January, proceeded and moored to King George V dock, Glasgow. Commenced unloading at 1900, 29 January, and completed unloading 2330, 30 January. Passengers were disembarked 29 and 30 January, proceeding directly to their assigned stations of duty via transportation arranged for by the Chief of Transportation, S.O.S., E.T.O., U.S.A., A.P.O. 887.
- 7. Departed Glasgow 1525, 31 January, anchored off Greenock at 1833, and at 0000, 3 February, departed Greenock and proceeded en route United States in Convoy TU-7, in accordance with reference (c), BOGUE in position 61, acting as Convoy Vice Commodore. At 08000, 14, February, arrived Hampton Roads, Virginia.
- 8. En route to the United Kingdom, heavy seas were encountered, causing heavy rolling, the maximum about 32 degrees to port. Returning to the United States, heavy seas were again encountered, causing heavy rolling and pitching, the maximum roll about 40 degrees to port. Enclosure (B) is a list of damage sustained due to heavy seas.

ENCLOSURE (B) to CO USS BOGUE Ltr. A4-3/A14-1 Serial OUD of 2/14/44.

### LIST OF DAMAGE SUSTAINED DUE TO HEAVY SEAS

- (a) Longitudinal deck supporting girders from apron to frame 18: Starboard side, No. 1, 2, and 3 twisted, bent and torn loose from frame overhead; Port side, No. 1 twisted, bent and sheared off at frame 18.
- (b) Transverse beam, frame 18, twisted, bent and welds torn loose from deck overhead. Also sagging in the center. Upright support and brackets sprung, welds cracking and showing great stress.
- (c) Transverse beam, frame 22, showing stress and sagging in the center. Upright supports and brackets sprung and showing considerable stress.
- (d) Transverse beam, frame 28, extension beam and support for No. 1 and 2 40mm gun mounts twisted, sagging and cracked loose from inboard catwalk bulkhead, port and starboard.
- (e) Transverse beam, frame 34, extension beam support for No. 1 40mm gun platform sheared loose from inboard catwalk bulkhead; stressed and sagging.
- (f) Inboard curtain bulkhead on port and starboard catwalks buckled, sprung, and cracked. Adjoining catapult room bulkhead torn.
- (g) Port and starboard walkways buckled, bent and cracked.
- (h) Lookout platforms raised, deck buckled and chair and fixtures torn loose.
- (i) Ship's structure from frame 18 to 40 show signs of stress.
- (j) Flight deck warped and buckled; planking pulled up from forward end to frame 34.
- (k) Gasoline line brackets broken, frames 16-40 starboard.
- (1) Brackets for antenna, frame 40, broken off. Tube lead-ins bent.
- (m) Electric leads to running lights and landing lights broken and torn loose.

# LIST OF DAMAGE SUSTAINED DUE TO HEAVY SEAS (Continued)

- (n) Insulation under catapult torn out.
- (o) Catapult track outwardly intact. Will have to check.
- (p) Bull horn wiring and bracket torn loose.
- (a) 40mm shell chute buckled and out of alignment.
- (r) WT door to well deck, starboard side from hangar, not watertight. WT door to 1st division leaks.
- (s) #3 sponson: Strake plates dished and buckled and three structural members sprung and bent. Jack rods broken and bent under sponson. Forward part of sponson: Strake plates buckled and structural members sprung.
- (t) Fire main riser, frame 28, ruptured and breaking.
- (u) Cracks in skin of ships
  - No. 1 sponson frames 72,73,74,75,77, and 81.
  - No. 2 sponson frames 72,75,77, and 83.
  - No. 3 sponson frames 135,137, and 114. No. 4 sponson frames 137,138, and 136.
- (v) Shaft alley leaks in skin of ship: Frames 177,178, and 179 port side. Frame 176 starboard side.

#### February (944

23-25 for duty with 12 TBF's and 9 FM-1's.

Formed Task Group 21.11 composed of U.S.S. BOGUE,

HAVERFIELD (Comcortdiv 51) U.S.S. HOBSON, U.S.S.

SWENNING, U.S.S. JANSSEN, and U.S.S. WILLIS under ope

tional control of Cinclant. Underway to rendezvous

with convoy UGS-34 and to operate offensively against

enemy submarines in Central Atlantic area.

#### Merch - 1944

- 1 Task Group en route to join UGS-34.
- 2 Joined UGS-34 and fueled escerts.
- Task Group left convoy to proceed to area of enemy su marine concentrations, northeast of Azores.

13 -SUNK US75 Sighting of a suspicious oil slick by search plane in 46-18 N, 27-34 W, led to sonar search resulting in so contact with an enemy submarine. Several depth charge attacks by escorts plus HMCS Prince Rupert which appears on the scene cause the submarine (German) to surface where it was sunk bu gunfire. Recovered 40 prisoners of war.

- 14 En route Casablanca, French Morocco.
- 18 Arrived Casablanca, French Morocco.
- Departed Casablanca, French Morocco to operate offensi against enemy submarines in area west of Caps Verds Islands.

# April -1944

1 Task Group (21.11 operating offensively against answer

# June 1944 VC-69

- 1 At Casablanca, French Morocco.
- Task Group underway to operate against enemy submering in area 43-48 N. 20-30 W.
- 3 U.S.S. HAVERFIELD rejoined Task Group.
- 6 U.S.S. SWENNING picked up eight survivors of an R.A.F. Halifax which had been forced down at sea, and transferred them to BOGUE.
  - 16 Task Group ordered to area 21-00 N, 40-00 W.
- Having followed the trail of an enemy submarine for SANKSE several days it was sighted and attacked in 15-15 N, 39-55 W, by search planes. Submarine was believed sun later confirmed.
  - Inspection of large quantities of debris from the night attack revealed submarine was a Japanese carrying rubbe to a German port.
  - 26 Task Group en route Bermuda, British West Indies.
  - 30 Arrived at Bermuda, British West Indies.

# ruly 1944 Vc-42

- 1 Task Group 22.2 left Bermuda en route to Norfolk, Virgi
- (3) Arrived Norfolk, Virginia. Dissolved Task Group 22.2.
  - 4 Proceeded to Navy Yard.
- 5-21 At Navy Yard.
- 22-23 At Naval Operating Base. Embarked VC-42 with 12 Tables and 9 FM-2's for duty.
  - 24 Conducting calibration runs in Chesapeake Bay.
  - 25 Formed Task Group 22.3 with U.S.S. HAVERFIELD (DE 1991)

VC-42 July 1944

(Comcortdiv 51), U.S.S. JANSSEN (DE-396), U.S.S. WILLI: (DE-395), U.S.S. WILHOITE (DE-397), U.S.S. SWENNING (DE\*394) under operational control of Cinclant. Underway en route Bermuda area for ASW training exercises. Contacted and conducted simulated air attack on convoy

26

UGS-49.

27-29

Conducted ASW training exercises off Bermuda.

29-31

Anchored in Port Royal Sound, Bermuda.

August 1944

At anchor, Murray's Anchorage, Bermuda, British West Indies. Task Group departed Bermuda to operate offen-

sively against enemy submarines in North Atlantic area. While on routine night search, Lt. (jg) Dixon A-V(N), in TBM #17 reported he was investigating a suspicious radar contact. Nothing further was ever heard from Lt. (jg) Dixon and he and his crew, Scimio, G.J., AOM3/ 821-39-93, and Melton, C.G., ARM2/c, 644-43-64, are believed to have crashed at sea. Search for missing men underway.

17

Search abondoned for missing plane crew due to weather and possible enemy submerine contacts.

19

Night search plane sighted and attacked an enemy submarine in Latitude 42-06 N. Longitude 50-50 W. Result undertermined. Further search was unproductive of results.

Surfaced enemy submarine sighted and attacked by war-

28 February 1945

- Morred Gladstone Dock, Liverpool.

### (B) NARRATIVE

The activities of the U.S.S. BORKE during December 1944, January and February 1945, were of a coutine training character as indicated in the foregoing chronology with the single exception of seven days spent operation against enemy submarines reported in the Gulf of Maine. This operation did not result in any known successful attacks, although two possible contacts were made. These were lost before they could be properly developed.

The award of the Presidential Unit Citation, as described in Appendix "A" was outstanding during this period. The Citation itself was not presented to the Unit at the time, being highly classified and is not r a part of this report. It will be forwarded when released at a later of the report.

# (B) NARRATIVE

The first of March, 1945, found the USS BOGUE in Gladstone Dank, 11. unloading sircraft delivered to England for United States forces; Tash (1700)

CVED/

#### CONFIDENTIAL

for March, April, May, June, July, August 1945.

composed of the USS BOGUE and Escort Division 51, temporarily non-operative.

Departing on March 3, the BOGUE joined convoy CU 58B en route to New York, but nearing the United States, was detached and routed to her home port, Norfolk, Virginia.

On March 15, she left Norfolk to conduct carrier qualification training landings in the Quonset Point, Rhode Island, area.

Breaking off carqual operations sooner than expected, the Task Group was ordered to NOB, Norfolk to prepare for an operational cruise. The period of 24 March to 10 April was spent in the Norfolk Navy Tard and at NOB completing these preparations.

At sea on 11 April, Task Group 22.3, composed of the USS BOGUE and CortDiv 51 (USS HAVERFIELD, JAHSSEM, WILLIS, WILHOITE, SWENNING, and COCKRUL) with Captain G. J. DUFEK, commanding officer of the BOGUE as CTG, proceeded to the New London area for refresher anti-submarine training with the USS MACKERAL. These exercises continued for three days.

At 1016, 16 April, the group departed Marragansett Bay, Rhode Island, to sweep along Latitude 400 H to Longitude 450 W where rendezvous was effected with Task Groups 22.4, 22.8 and 22.7.1, who were placed under the tactical command of CTG 22.3. An operations plan for conducting a barrier, Enclosure (M), was passed to all ships and the entire force swept eastward and established a barrier 120 miles north and south centered at Latitude 43° B, Longitude 41° W. This barrier was the basic tactical disposition throughout the operation. TG 22.3 operated in a 25-mile sector on the southern end, TG 22,8 and TU 22.7.1 in the center, and TG 22.4 in another 25-mile sector on the northern end. The escort groups were augmented by two ships each from the carrier groups to increase the efficiency of the surface barrier in the center. As the barrier was moved from time to time complying with orders of Commander-in-Chief, U.S. Atlantic Fleet, the same disposition was maintained and the force moved as a scouting line making as thorough a search as the required speed of advance permitted. It was made standard practice to use all available ships for surface searches in developing all probable or positive contacts. At these times responsibility for maintaining the barrier evolved, of necessity, on the carrier groups and their aircraft.

During a major portion of the period night landings were made extremely hazardous by weather conditions. Rough seas, frequently combined with meagre wind, prevailed during most of the clearer weather. At other times fog and a continual passing parade of fronts resulted in impossible flying conditions. Too frequently, therefore, night flying had to be restricted to the four hour before dawn that would permit daylight landings.

U.S.S. BOGUE aircraft attacked two positive and one protection was and

(0)

#### CONFIDENTIAL

for March, April, May, June, July, August 1945.

during this period and assisted planes from the U.S.S. CORE in a fourth attack. In addition to these, six "disappearing radar blips" were investigated with sonobuoys and later abandoned. Escort ships of TG 22.3 attacked one probable sonar contact and investigated numerous other sonar, radar and visual contacts finally classified as non-submarine. Ships in the scouting line made three contacts which were first evaluated probable or better but, after extended search with negative results, were reclassified as none-submarine.

One enemy submarine, identified as the U-546, was sunk by the ships after it had torpedoed the U.S.S. F.C. DAVIS, (DE-136) which was engaged in the search following an aircraft attack made by Lt.Comdr. W.W. SOUTH, commanding officer of VC-19, embarked aboard the U.S.S. BOGUE. Thirty-three prisoners, including the Commanding Officer and First Lieutenant were taken. See Enclosure (K).

At 1507, 23 April, Lt.Comdr. SOUTH while on anti-submarine search, sighted a U-Boat in the act of surfacing, bearing 042° T from the U.S.S. BOGUE, distance 74 miles, in Latitude 43-05 M, Longitude 40-20 W. As he approached on his attack run, the U-Boat subserged and he dropped depth charges ahead of the swirl. Returning, he laid a standard sonobuoy pattern and received positive indications. The pattern was expanded and a barrier box of buoys laid, 6 on a side, spacing four miles, twelve miles from the point of attack. All available ships were immediately ordered to the scene. Sonobuoy indications continued until 1709 on the original pattern then ceased. Ships arrived at 1910 and continued search through out the night. Aircraft were kept in the area monitoring the buoys and making radar and visual searches until bad weather forced cessation of flying at 2135. At 1040 the following morning, 24 April, the U.S.S. F. C. DAVIS was torpedeed while investigating a sonar contact made during the search in Latitude 43-51-15 N, Longitude 40-15-30 W, bearing 004° T, distance 51 miles from the position of Lt. Comir. SOUTH's attack. She sank in approximately 20 minutes. All other ships converged on the contact and to pick up survivors. The hunt continued all day with frequent contacts and attacks until at 2040 the U-Boat, then under severe hedgehog and depth charge attacks, surfaced and was sunk by gunfire from nearby escort vessels. Sixtyseven survivors of the U.S.S. F. C. DAVIS were transferred to the U.S.S. HOGUE for medical care. See Enclosure (J). All but three were later transferred to the U.S.S. HAYTER for further transfer to Receiving Ship, Argentia, Newfoundland. Prisoners were also sent to Argentia.

At 1701 a plane on anti-submarine search from the U.S.S. OCHE reported a disappearing radar blip followed by positive sonobusy indications in Latitude 40-15 N, Longitude 49-C7 W, bearing 082° T from the U.S.S. BOGUE, distance 57 miles. BOGUE aircraft then searching in the area were vectored to the scene to assist and turned over to the U.S.S. CORE for operational control. At 1915 Lt.Comir. W.W. SOUTH (BOGUE) made an attack on excellent schobusy indications without result. Surface ships arrived at approximated

# CONFIDENTIAL

for March, April, May, June, July, August 1945.

1940 and continued to search until 0220 2 May when the hunt was abandoned and the barrier line resumed. No sonar contact was established at any time.

At 1605, 2 May, It.(jg) M.B. WHEKLER made radar contact bearing 322° T from the ship, distance 33 miles, in Latitude 39-51 N, Longitude 51-37 W. The blip disappeared as he approached to 2½ miles. A standard sonobuoy pattern was laid and probable indications received. Seven other aircraft and all ships from the scouting line were despatched to the scene. The pattern was expanded and an attack made on good indications without results. At 2255 the search was abandoned after wire recordings of the indications proved the contact deubtful.

At 2015, 4 May, Lt. (jg) T.E. JENKINS made radar contact bearing 2780 T from ship, distance 75 miles, in Latitude 40-54 N, Longitude 53-39 W. As he approached, the blip faded but positive indications were received on . a standard sonobuoy pattern, the best of which he attacked without results. The pattern indicated a northerly course. The gunner believes that he saw something, possibly a periscope, near the pattern just before the attack. All ships were ordered to the scene and at least three aircraft kept over the area until 0330 the following morning. At 2205 a sonobuoy barrier was laid nine miles north of the contact in hope that the U-Boat might have continued on the course originally indicated due to lack of any explosive attack. Excellent cavitation and loud foxer noises were heard on a buoy in this barrier bearing 351° 9.5 miles from the hole at 2421. A check of the escort commanders within 30 miles showed no ships streaming foxer, forcing the conclusion that indications were from a U-Boat with foxer. Ships were directed to the original position and five sent to this position, arriving at 0140, 5 May. At 1427 an aircraft from the U.S.S. CORE had a disappearing radar contact followed by possible sonobuoy indications bearing 1040 distance 24 miles from Lt.(jg) JEKINS contact. The ships were directed to search this area but did not gain contact and were returned to the barrier line west of both positions at 1940, 5 May.

Searches were continued until 9 May when cessation of hostilities brought about release of the three Task Groups from the tactical command of CTG 22.3, this Task Group being directed to proceed to New York on stand by. Eight days were spent at Pier 88, North River, New York.

Departing on 19 May, the U.S.S. BOGUE proceeded to Norfolk for a yard period before being turned over to the Pacific Fleet.

On 10 June, fresh from the yard, the BOGUE departed Norfolk to pick up a load of Army aircraft at Statem Island, to be delivered to Cristotal, Canal Zone, while on route to the Pacific.

Departure was taken from Staten Island on 19 June, arriving at

#### CONFIDENTIAL

for March, April, May, June, July, August 1945.

Cristobal 24 June, where the aircraft were unloaded and the ship reported to the Pacific Fleet and Carrier Transport Squadron Pacific.

Transit of the Panama Canal was made on 27 June, en route to San Diego.

In the Pacific the BCGUE's duties were entirely transport. One trip, from San Diego to Guam, via Pearl Harbor, returning to Alameda, California was made before the cessation of hostilities with Japan. The end of the war found the BOGUE in Alameda preparing to continue transport operations.

### (C) DECORATIONS and AWARDS

Official release by the Mavy Department of the text of the Presidential Unit Citation awarded to the erew of the U.S.S. BOGUE, her escorts, and embarked equadrons as detailed in the preceding U.S.S. BOGUE UNIT HISTORY REPORT dated 15 March 1945, highlighted this period.

The text of the citation reads:

\*For extraordinary heroism in action against energy subscrines in the Atlantic Area in 1943, and 1944. Carrying out powerful and sustained offensive action during a period of heavy German undersea concentrations threatening our uninterrupted flow of supplies to the European theater of operations, these six Anti-Subscrine Task Groups tracked the energy wolf packs relentlessly and, by the unwavering vigilance and persistent aggressiveness of all units involved sank a notable number of hostile U-boats. The gallantry and superb teamwork of the efficers and men who fought the embarked planes and who sammed the EOGUE and her escort vessels were largely instrumental in forcing the complete withdrawal of energy submarines from supply routes essential to the maintenance of our established military supremacy."

# Other awards included:

Distinguished Flying Gross awarded to Lt. Comdr. Conley C. Laster, Jr., presented by Captain G. J. Durek aboard the U.S.S. ECCUE on 12 August 1945.

Bronse Star Medal awarded to Commander C. H. Quinn, Executive Officer, and to Lt. Comdr. W. O. Moore, Air Officer of the U.S.S. HOGUE, presented by Bear Admiral A. C. Read at HAS Norfolk on 7 February 1945.

The vessels, which from time to time comprised the Task Groups, and the composite squadrons which from time to time were part of the Task
