HOW THE ATLANTIC COAST LINE IS DEING GUARDED AGAINST SUBMARINES

1.98

4.58

American buttleships on the Atlantic cons. and muts of the mosquito fleet.

This picture was taken just before the strict consorship against photographs showner the movements of the fleet was put into force following the declaration of war against Germany. It shows, lowever, how the Atlantic coast is being guarded against the depredations of hostile submaines. The swift mesquito fleet is very useful in running cown and destroying underson boats. The present location of our war vessels is known only to the navy department and their future movements will be head on an

JOIN US IN A NATIONAL SERVICE

We cannot all go to war, we are not all the right age limit and with the rugged physical standards demanded of the warrior, yet we can all do a service by engaging in the production of a national, in-

ternational life necessity, in the production of more OIL.

The consumption of oil is 200,000 barrels per day more than the production and unless more oil is produced in the immediate future we will have a United States Oil Dictator.

The auto owners and other consumers would be told by their govs rer day or per week or per month they might consume. Last week Roosevelt advocated the limitation on the

consumption of gasoline. Developing oil properties is the greatest profit-paying business in
