Cmdr. T. C. Maloney

USS NATHAN HALE CHAPTER #68 U.S.C.S.

COMMISSIONING OF THE NUCLEAR-POWERED ATTACK SUBMARINE

USS BATON ROUGE

SSN 689

JUNE 25, 1977

Newport News Shipbuilding

Commissioning of a Navy Ship

The commissioning ceremony marks the acceptance of a ship as a member of the operating forces of the United States Navy. At the moment of breaking the commissioning pennant, *USS BATON ROUGE* (SSN 689) becomes an active member of the fleet. The Commanding Officer, together with the ship's officers and men, has the duty of making and keeping her ready for any commitment required by our nation in peace or war.

The commissioning pennant is the historic symbol of a man of war. It is believed to date from the 17th century when the Dutch Admiral Maarten Van Tromp hoisted a broom at his masthead to symbolize his having swept the British from the sea at Dungeness. The following year, British Admiral William Blake hoisted a horse whip to his masthead—indicating his intention to chastise the Dutch. The victorious British thus set the precedent for a long, narrow commissioning pennant as a symbol of Admiral Blake's horse whip and as the distinctive mark of a ship of war.

City of Baton Rouge

On the present site of Louisiana's historic Old State Capital Building there once stood a tall red cypress tree, stripped of its bark, marking the boundary between the hunting grounds of the Houma and Bayou Goula Indians. French *voyageurs* aptly named the tree "the red stick"— *le baton rouge*.

Louisiana's Capital City, Baton Rouge was founded in 1719 by the French during their exploration of the Mississippi River. Since then, the flags of seven governments have flown over Baton Rouge . . . from the *fleur-de-lis* of the Bourbons to the stars and bars of the Confederacy.

Because of its superb location on the first high ground along the Mississippi River north of the Gulf of Mexico, Baton Rouge has flourished.

The city is the hub of one of the greatest concentrations of industry in the nation—the heart of the Chemical Strip which extends 100 miles south to New Orleans. Investments in new manufacturing facilities along the strip have totaled more than two billion dollars in the past decade.

The port of Baton Rouge stands as one of the finest deep-water facilities in the world. Docks and terminals serve both ocean-going vessels and river transportation with the most modern facilities available. Total tonnage handled at the port is rapidly expanding, and Baton Rouge now ranks as the fourth largest port in the United States.

Baton Rouge is a well-known Southern education center. More than 31,000 students attend Southern University and Louisiana State University—home of the famed LSU Tigers.

As the focal point of industry, education, government and recreation in the South-Central United States, Baton Rouge is a dynamic and progressive city, admirably prepared to meet the challenges and goals of the future.
