## USS DULUTH (LPD-6)

## Welcame aboard

Dear Guest,
On behalf of the officers and men of DULIUTH, I extend to you a warm welcome. We are delighted to have the opportunity to show you what we mean by "LULUTH PRIDE".

During your sisit, you will see a complex ship with some of the most modern technology incorporating experiences of amphibious operations dating hack in World War II. You will also have the opportunity to meet the bawkbone of DULUIH- the men and women who sail ber. I trust you will gol away with an appreciation for the dedication and competency required to operate one of the U.S. Navy's finest ships.

I hope your time aboard will he enjoyable as well as cducational and will help to increase your understanding of DULUTH. her mission. and the United States Navy.

## USS DULUTH (LPD-6)

USS Duluth's koel was laid December 18, 1963. She was commissioned 2 years fater as the last fighting ship to be built al the New York Naval Ship Yard on December 18. 1965.

DUI.ITH is naned after the city of Duluth. Mirmesuta, which in turn derived its name from the French explorer Danicl GreysoIon Sieur Du Lhut $1636-1710)$, famous for serving as a peacemaker berween the Chippewa and Sioux Indian Iribes.

The most versatile class of ship in the Navy, DULUTH combines the functions of three classes of ships; the dock landing ship (LSD), the tank landing ship(LST), and the attack cargo ship (LKA). DULUTH is also unique in having a helicopter flight sleck built ower her well deck, providing a tactical advantage by adding the capability of lifting troops, supplies and equipment onto the same ship. DULITFH's versatile design allows her to contribute fo all phasex of the amphibions assault.

DULITHH's most distinctive reature is ler well deck; a large floodable dorking area inside the hull of the ship. The ship ballasts down which in turn floods the well deck with enough water to enable the landing craft to depart or enter the sthip through the stem gate for loading or unloading. Located forward of the well dock is upperflower vehicle storage, which holds most of the embarked troopx' heavy equipment such as tanks, tracked amphibious landing vehicles(AAV), iocps and trucks. At the same time, troops and equipment can he Ioaded via helicopter from the flight deck.

## STATISTICS

Speed 20 kls plus.
Full load digplacement ..... 16.912 tons
